

Pension Prophet

Irish Life Corporate Business

Will your pension fund level allow you to maintain your lifestyle in retirement?
Be a master of your own destiny!

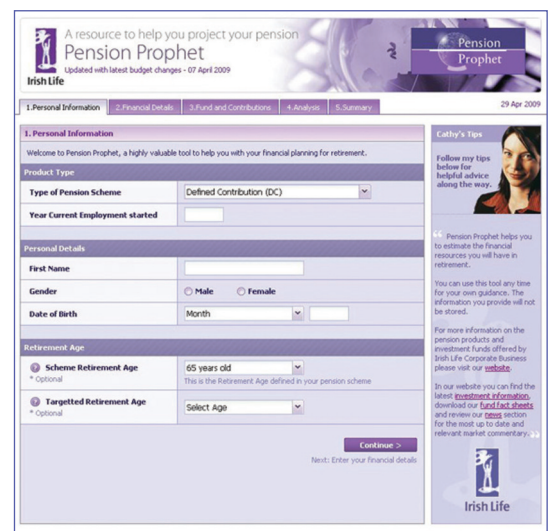

www.pensionprophet.ie

Pension Prophet is an easy-to-use projection tool to help with financial planning for retirement. Pension Prophet predicts the size of the pension fund a member may accumulate at retirement based on:

- current and projected contribution levels,
- investment returns,
- income and inflation developments.

Projections can be varied to see what effect different contribution amounts and investment periods can have on the fund.

Pension Prophet

- Projections can be run specific for AVC, PRSA and DC arrangements.
- An interactive investment risk profile links a member's attitude to investment risk to the likely fund growth rate.
- Pension Prophet takes account of likely expenses in retirement to evaluate savings targets. The results highlight whether a member is on track to meet saving targets for retirement benefits.
- The tax-free lump sum calculation for DC and AVC funds is based on potential service. For PRSAs it is based on 25% of the fund value.
- Easy to use help sections to guide you through the application.
- At the end, print a summary of the projections for your records.
