Pension Increase Products Explained

Compound Interest	The pension will increase by a fixed percentage each year. The increase will always be based on the latest pension amount. These increases are also known as cumulative.
Inflation	The Pension will always increase in line with inflation (the Consumer Price Index). There is no cap/limit on the increase given and will always reflect the CPI.
Inflation - Yearly Cap	The pension will increase by the lesser of (a) the increase in inflation or (b) the nominated percentage cap. The inflation increase is calculated using quarterly CPI figures over the previous year.
Inflation – Long Term Cap	The pension will increase by the lesser of (a) the increase in inflation since commencement or (b) the nominated percentage cap. The inflation increase is calculated using the CPI figures at retirement date and the latest quarterly CPI figure.

In the event of negative inflation, we will not reduce the payment levels on CPI linked annuities.
